

**Ages 8-13**

# **Computer Coding Half Day Camp**

## **August 17-21, 2015**

### **LeMoyne College**

#### **Half Day Camp**

Using programming languages geared to 8-13 year olds, children will learn coding skills through the creation of games and animations. Both beginner and advanced coders will learn new concepts, have daily challenges and collaborate with others in a creative environment. In addition, they will have the opportunity to try some exciting hands on circuit projects that will integrate with programming languages for a technology experience they will be talking about for weeks after!
